MOOSE MOUNTAIN

This alpine ridge is rich in Montana color and intrigue. Smokey grey, tan and chocolate tones of Moose Mountain blend naturally and harmoniously into any environment.

Perched high above the treeline, the rugged peaks of Castle Rock tell the story of strength and beauty. Varying shades of brown blended with deep grey cores reveal Castle Rock's depth and character.

CASTLE ROCK

Rich and reminiscent of the Old West, the dark brown and brilliant reds of Montana Antique provide a vivid contrast to the dark grey interiors.

DISCLAIMER: Montana Antique may leach rust. Montana Rockworks, Inc provides no warranty, expressed or implied, against any rust leaching.

Created by nature, crafted by man.

The projects showcased within these pages were installed by true artists and craftsman. Please consult your building professional for information regarding natural stone installation on your project.

For additional photographs and technical information please refer to www.montanarockworks.com.

Thank you for choosing Montana Rockworks, Inc.

Hydraulic Thin Veneer Splitter

"The Mighty C is absolutely irreplaceable. Not only has productivity increased, but company moral is the best its ever been. We are currently using two Mighty C's and about to buy a third."

Kraig Arndt
Arndt Masonry - Washington

"There are so many benefits to having the Mighty C. Minimizing the hazardous dust, not having waste water to deal with when using a wet saw and just flat out being more productive. I can't imagine doing a job without my Mighty C."

Tony Lindberg
Lindberg Masonry - Kalispell, MT

"Coming from a masonry family of over 50 years, The Mighty C is the most innovative tool we have ever used. It helps us give our clients the traditional masonry style and eliminates saw cutting. Thereby reducing air pollution and costly clean up time. We love it."

Jack & Nick Delavan
Delavan Masonry - Coeur d'Alene, ID

"We have found the Mighty C to be three times faster than saw cutting. Due to the portability for indoor use and the elimination of dust from saw cutting, we are going to buy another one."

Chris Akins
Chris Akins Masonry - Spokane, WA
